

List of Invention Patents By Sunil Contractor

	PAT. NO.	Title
1	7,809,378	Location visit detail services for wireless devices
2	RE41,692	Telephone caller location data retrieval
3	7,711,102	Automatically sequentially ringing alternative telephone numbers
4	7,668,559	Smart call delivery with GIS integration
5	7,664,510	Location-based forwarding of a communication
6	7,649,987	System and method for forwarding selective calls
7	7,627,092	Method of notifying a party of an emergency
8	7,564,958	System and method for delivery of a message to multiple destinations
9	7,388,949	System and method for audio caller identification service
10	7,385,516	Location visit confirmation services for wireless devices
11	7,362,851	Location ID service for telephone calls
12	7,292,865	Location visit detail services for wireless devices
13	7,277,922	Completion of internet session notification service
14	7,194,080	Automatically sequentially ringing alternative telephone numbers
15	7,123,152	Location visit confirmation services for wireless devices
16	7,120,239	System and method for providing no no-answer detail service for telephone calls that are not completed
17	7,099,677	Smart call delivery GIS integration
18	7,099,312	System and method for delivering personalized messages to selected calling parties
19	7,016,477	Method of notifying a party of an emergency
20	7,006,833	Location-based forwarding of a communication
21	6,931,107	Systems and methods for per-use busy message
22	6,879,676	System and method for routing a call to an optimal location
23	6,862,345	Systems and methods for per-use no-answer message
24	6,847,824	Location visit detail services for wireless devices
25	6,831,563	Location visit confirmation services for wireless devices
26	6,804,341	System and method for providing no no-answer detail service for telephone calls that are not completed
27	6,792,081	Emergency notification system
28	6,754,324	Systems and methods for no-answer redial and connect
29	6,721,406	Telephone caller location data retrieval
30	6,711,240	Systems and methods for per-use message delivery
31	6,683,940	Transferring voice mail messages to a data network
32	6,674,840	Systems and methods for verifying the provisioning of advanced intelligent network services
33	6,608,886	Method and apparatus for establishing a connection between first and second communication devices
34	6,427,001	System and method for notification of 911 telephone calls using a link monitoring system
